2645

DATE MAILED: 05/21/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

**Office Action Summary**

Application No.

10/015,054

Applicant(s)

KIM, MOON-YOUNG

Examiner

Roland G. Foster

Art Unit

2645

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 11 December 2001.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-3 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1 and 3 is/are rejected.
- 7) ☒ Claim(s) 2 is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☒ All    b) ☐ Some \*    c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
  2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_.
  3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claim recites the limitations "the activated advertisement data" and "the deactivated advertisement data." There is insufficient antecedent basis for these limitations in the claim. In the interest of compact Office prosecution, the limitations will be interpreted as not dependent upon antecedent basis in this Office action. Correction is required.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent

Application Publication No. US 2003/0181201 A1 to Bomze et al. (hereinafter "Bomze").

See the following paragraphs for details on how Bomze anticipates particular limitations within the claim.

The limitation "(a) receiving advertisement data through a wireless Internet network" reads on the abstract where a mobile computing device 10 receives advertisement data through a wireless network. The advertisement data is sent by web server 12 through the wireless network to the browser enabled device 10 (paragraphs 0026 and 0027). Therefore, Bomze discloses that the advertisement data is transferred through a wireless Internet network.

The limitation "(b) comparing the received advertisement data with advertisement data stored in a storage device of a mobile communication terminal, to thus update the received advertisement data" reads on Bomze as follows. The received advertisement data includes a removal message (paragraph 0057), which is compared to with related advertisement data previously received and stored in the storage device of the device 10 (mobile terminal) in order to be removed (the previously received advertisement message and related data) (paragraphs 0058 and 0059).

The limitation "(c) determining whether the mobile communication terminal is activated and selecting advertisement data to be displayed on a display of the mobile communication terminal from the storage device according to the determination result" reads on Bomze as follows. Determining whether the mobile terminal is activated and selecting advertisement data accordingly can be interpreted as determining whether a the terminal is used to make a telephone

Art Unit: 2645

call, or whether information is transmitted and received at the mobile terminal consistent with applicant's specification (e.g., see page 7, second paragraph). Similarly, the advertising system of Bomze determines whether the mobile terminal (mobile device 10) is activated when the user utilizes the mobile terminal to contact (call) an electronic commerce company, and when information can be transmitted and received at the mobile terminal while carrying out this electronic commerce. Note also that the user can directly select (activate) the advertisement function at the mobile terminal (paragraph 0046). The displayed advertisements were previously stored and correlated with user data and are thus retrieved from a memory (storage) device in the mobile terminal when displayed (Fig. 1B and paragraph 0045).

The limitation "(d) displaying the selected advertisement data on the display of the mobile communication terminal" reads on paragraph 0054.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Bomze as applied to claim 1 above, and further in view of U.S. Patent No. 6,084,583 to Gerszberg et al. (hereinafter "Gerszberg").

Bomze discloses most limitations within this claim. Specifically, Bomze discloses determining whether the advertising function in the mobile terminal is activated by determining whether the user placed a call, transmitted and received information, or directly activated the function as discussed above. Bomze also discloses that the activated advertisement data stored in the storage device of the mobile terminal is then selected. See the claim 1 rejection for further details.

However, Bomze fails to disclose "selecting the deactivated advertisement data stored in the storage device when the mobile communication terminal is deactivated."

However, Gerszberg teaches of a wireless, Internet network based, "active" advertising system using a screen based telephone (abstract, col. 2, lines 1-16, and col. 5, lines 1-27) that also supports the selection of deactivated advertisement data stored in the storage device (screen saver memory) when the terminal is inactive (deactivated) (abstract).

Therefore, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to add the selection of deactivated advertisement data stored in the storage device of the terminal when the terminal is inactive as taught by the wireless, Internet network based, active advertising system using a screen based telephone of Gerszberg to the wireless, Internet network based, active advertising system of Bomze that also uses a screen based telephone.

The suggestion/motivation for doing so would have been to increase revenue and reduce cost by providing a 'cheap medium for advertising while protecting the touch screen displays of video telephones" (Gerszberg, col. 2, lines 29-36), which has applicability to the telephone display of Bomze.

***Allowable Subject Matter***

Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Examiner's Reasons for Indicating Allowable Subject Matter***

Claim 2 in view of claim 1 is directed to a detailed and ordered method for displaying an advertisement on a mobile communication terminal. The method, step (b) comprises separate version searching, update determination, reliability searching of the stored advertisement data to be updated, determination of the reliability, and storage of the advertisement data whose reliability is determined in the storage device.

The closest prior art of record is Gerszberg as applied above. Gerszberg discloses all within the claims except the recited reliability steps.

Art Unit: 2645

The remaining prior art of record fails to teach or fairly suggest the obviousness of substantially modifying Gerszberg in order to arrive at the invention as claimed in detail by the applicant.

The above reasons for allowance are based on the claims as presently set forth in their totality. The above reasons for allowance should not be interpreted as indicating that amended claims broadly reciting certain limitations discussed in the above reasons for allowance would be allowable. A more detailed reasons for allowance may be set forth in a subsequent Notice of Allowance if and when all claims in the application are put into a condition for allowance.

*Conclusion*

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roland Foster whose telephone number is (703) 305-1491. The examiner can normally be reached on Monday through Friday from 9:00 a.m. to 5:30 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Fan S. Tsang, can be reached on (703) 305-4895. The fax phone number for this group is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to customer service whose telephone number is (703) 306-0377.

Roland G. Foster  
Primary Patent Examiner
